PRACTICAL: 3

AIM: Create a feedback form using form handling.

CODE:

```
<html>
<head>
        <title> feedback-form </title>
</head>
<body style="background-color:powderblue">
        <form>
        <fieldset>
        <legend> <H1>FEEDBACK FORM </H1></legend>
        <DIV>
                <label for="name"><h3>ENTER NAME: </h3></label>
                <input type="text" name="name"><br>
                <label for="emails id"><h3>EMAIL ID:</h3></label>
                <input type="text" name="EMAIL ID"><BR>
                <h3>Experience:</h3><br>
                <textarea row="3" cols+"10"></textarea><br>
                <label for="comments"><h3>Comments:</h3></label>
                <input type="radio" value="GOOD"/>GOOD
                <input type="radio" value="BAD"/>BAD
                <input type="radio" value="AVERAGE"/>AVERAGE <BR>
                <input type="submit" values="submit">
        </DIV>
        </fieldset>
        </form>
</body>
</html>
```
